Sea water potato

RECORDED

A.D. 1872, 3rd April. N° 976.

Manufacture of Bread, &c.

(*Provisional Protection not allowed.*)

PROVISIONAL SPECIFICATION left by William Edward Hodgson at the Office of the Commissioners of Patents, with his Petition, on the 3rd April 1872.

I, WILLIAM EDWARD HODGSON, of Kennington Park Road, in the County of Surrey, Baker, do hereby declare the nature of the said Invention for "IMPROVEMENTS IN THE MANUFACTURE OF BREAD AND OTHER FARINACEOUS FOOD," to be as follows:—

This Invention consists in manufacturing bread and other farinaceous food by the use of pure sea water, in the following manner and by the following means.

To manufacture bread, for example, I take the sea water and heat it to the ordinary temperature to set the ferment, then mix potatoe pulp, and add thereto the yeast and flour to make it into dough, and bake in the usual way.

The proportions of the above ingredients would be about the ordinary proportions used in the manufacture of bread and other farinaceous food.

Hodgson's Improvements in the Manufacture of Bread, &c.

Bread manufactured as above is easier of digestion, and more nutritious, the sea water containing the proper proportions of iodine, magnesia, and salt, and being perfectly free from any adulteration whatever.
